# What are Chatbots?

# What are Chatbots?

---

A chatbot is an artificial intelligence (AI) software that can simulate a conversation (or a chat) with a user in natural language through messaging applications, websites, mobile apps or through the telephone.

Standard Chatbots

Self Learning Chatbots

# What Is Microsoft Azure?

# What Is Microsoft Azure?

---

Microsoft Azure is a Cloud Service Provider that enables on-demand services like compute, storage, networking, etc which can be accessed through the internet and the user is not required to manage these resources
